

FOR AGRICULTURE

- We produce **high volume steel silos** used mainly for storage of different materials.
- Silos can be **equipped with heating systems** (electric or coils), **fire extinguishing devices**, **service elements** such as platforms, ladders, staircases or other accessories.
- Depending on the dimensions and transportation possibilities, **we carry out assembly on site**.

STORAGE SILOS

STANDARD DIMENSIONS AND WORKING LIMITS:

Diameter [mm]	Length [mm]	Working pressure [bar]	Operating temperature [°C]
ø 2 000 – *	4 000 – *	< 0,5	0 – 90

* depends on customer requirements and transportation possibilities

We are able to manufacture silos according to individual customer requirements in terms of materials and dimensions. We mainly produce storage tanks out of:

- stainless steel
- carbon steel
