

KARBON 2

COAL

KARBON 2 Sp. z o.o. has been in the coal business since the beginning of its operations, more than 30 years. Currently, our offer includes hard coal and lignite from most domestic producers. We cooperate, among others, with representatives of the Polska Grupa Węglowa, Jastrzębska Spółka Węglowa and the Grupa Węglkoks. The coal portfolio is supplemented by pellets produced from lignite coal on its own production line at KWB Sieniawa S.A. in Łagów. We have extensive experience in domestic trade, as well as in export and import.
