

HYDRAULICS

MOJ S.A. ODDZIAŁ KUŹNIA OSOWIEC (Forging Shop) is one of the oldest industrial plants in Poland. We specialize in production of forgings for the hydraulics industry, including the forgings for hydraulic actuators and cylinders. We cooperate with Polish and foreign companies.

OUR OFFER INCLUDE:

- hot forged steel forgings with a weight from 0.1 to 25 kg,
- production of forgings based on documentation provided or product sample,
- preparing CAD/CAM documentation for forgings taking into account our forging technology,
- production of forging tools,
- heat treatment and machining of forgings,
- shot blasting,
- cold and hot sizing.

AT THE CUSTOMER'S REQUEST WE OFFER

- magnetic inspection of surface defects,
- metallographic tests and strength tests.

Our company has been satisfying growing demands of customers for years. High quality of our products is achieved thanks to the constant improvement of the production process, the search for new technological solutions and the experience of our qualified personnel. Cooperation with our company is the guarantee of reliable and timely order performance. **In 2005 we received TÜV Certificate which guarantees high quality of our products and confirms the implementation of ISO 9001 Quality Management System.**
